4.There is a direct route connecting Kollegal with Coimbatore via Bylore. Hanur, Dimbam and Sathymangalam; the portion of the road between Bylore and Kollegal is crossed by two streams Maskatti and Uduthurai Halls and another bigger one, by name Gundal. Not seldom during the rainy season, the solitary bus road plying between Kollegal and Coimbatore has been held up on the mid road unable to forces rivers due to the gushing of rain water from the valleys higher up and the passengers stranded. Suitable culverts or bridges over these streams are absolutely essential in order that the journey between Kollegal and Coimbatore may be made without fear of such detention on road, particularly in the rainy season. This road passes through Reserve Forests which are abounding in wild animals. The risk involved in the passengers, who are landed near the streams, being faced with wild animals cannot be over emphasised. The Panchayat Board is conscious that this is not an opportune time to approach your Excellency with requests for putting these items of works involving heavy expenditure on hand. But the Panchayat Board begs to stress the need for these so that your Excellency may be pleased to order them to be taken up as a part of Post war Reconstruction Programme.

(b) Roads : The Panchayat Board states that the portion of the road viz., the direct route connecting Kollegal with Coimbatore via Bylore, Hassanur, Dimbam and Satyamangalam between Bylore and Kollegal is crossed by two big schemes, Maskatti and Uuthurai Halls and another big stream by name Gundal, and requests that the construction of bridges over these streams may be taken up as part of Post war Reconstruction Programme. A scheme of road development which might be taken up during Post War reconstruction was submitted to the Board in this D.Dis.718-44 dated 21-3-44 wherein the construction of bridges over the streams crossing the road between Kollegal and Hassanur has been included.

Sir,

Electricity - Kollegal Panchayat Board - Purchase of Mysore Power - Loan.
Govt. Memo No.1930 E/44-1 dated 17.5.44.

The Kollegal Panchayat Board does not appear to have taken action yet for the purchase of the machinery. Early this month an enquiry was received from the Executive Officer of the Panchayat Board when the loan should be drawn from Government.

As the matter relates to a Panchayat licensee's distribution, the Chief Electrical Inspector to Government has been requested to take all further action regarding the purchase of the machinery for changeover of the

Kollegal Panchayat Distribution to Sivasamudram supply and also to furnish the Executive Officer the information required by him regarding the drawal of the loan.

3/ The Chief Electrical Inspector to Government is being requested to submit a report to Government on the present stage of the matter.

3. The Chief Engineer (Electricity) in his memorandum No. 947 General dated 20-3-44 intimated that all further action for the purchase of the machinery for the changeover to hydroelectric supply may be taken by the Chief Electrical Inspector to Government.

4. Government have been addressed in this office No.2551 L/44-1 dated 26-3-44 for sanction of additional staff required for preparation of specification etc., as the work cannot be done by the existing staff of the Inspectorate without deterioration to their duties. In this office letter No.2188 L.E./44-1 dated 2-3-44 the Executive Officer, Kollegal Panchayat Board, has been asked to remit the fee of Rs.813 for the preparation specifications etc., for the changeover to hydroelectric supply and has also been intimated that Government have already been addressed to sanction the staff necessary for the work.

5. Necessary action will be taken as soon as the additional staff applied for is sanctioned.

6. The Panchayat Board will be informed shortly of the loan amount likely to be spent during 1944-45.

No. 6959 M/44-64 dated 8.9.45.

Sir,

Sub: Electricity - Kollegal Panchayat Board - Chan over to hydro electric supply from Sivasamudr
Ref: P.W.D. reminder dated 27.8.45 on this office no.6959 M/44-56 dated 20.7.45.

-o-

The quotations received for the frequency changer equipment and associated gear have been scrutinised and i found that as against an assumed price of Rs.65,000 for tl 13.2 KV line, M-G Sets control panels, transformers etc., the tendered price ranges from 85,000 Rs. to 95,000 Rs. This large difference necessitated a review of the entire proposal of obtaining a 25 cycle supply and converting it into 50 cycles supply for distribution purposes in the Panchayat Board area.

2. The Chief Engineer for Electricity suggested in th meantime that a study may usefully be made of the load potentialites of the Kollegal Panchayat and surrounding areas and I have since submitted a report to the Chief Engineer for Electricity on this. Therein, I have indicated the need for a reconsideration of the proposal

to convert the 25 cycle supply to 50 cycles as the increased cost of the equipments over the estimated figures, considerably alters the financial results of the whole scheme. It is desirable to take a final decision in the matter with reference to load possibilities not only in the Panchayat area, but in the Kollegal taluq, as well.

I have therefore not communicated to the Executive Officer, Kollegal anything further regarding the tenders received by him or the likely loan that he should apply for.

As soon as a final decision is reached in the matter in consultation with Chief Engineer for Electricity, a report will be submitted to Government.

'ELECTRICITY DEPARTMENT.

FROM
THE CHIEF ENGINEER FOR ELECTRICITY,
CHEPAUK, MADRAS.

TO
THE SECRETARY TO GOVERNMENT,
FORT ST. GEORGE, MADRAS.

SECL. SECTT. 2 APR 1946 1541 E

No.A.3/R.36/5547-G/42-125 dated 1.4.1946.

Sir,

Sub: KOLLEGAL DISTRIBUTION SCHEME.

With further reference to the Chief Electrical Inspector to the Government ~~xfxMx~~ letter No.6959-M/44-64 dated 8th September 1945, I forward herewith a report with estimates for the Kollegal Distribution Scheme, on the assumption that Mysore Government will agree to supply bulk power at the same rates as they have agreed to in the case of supplies to the Ceded Districts and Hindupur (vide in this connection Madras Government's letter No.1352-E/43-69 dated 26th November 1945, to the Hon.Residen in Mysore) plus a 10% surchage to which I have agreed. Copies of D.O.letter No.911 dated 13.3.1946 from the Chief Engineer for Electricity, Mysore to the Chief Engineer for Electricity (on leave),Madras, and of the latter's reply thereto are enclosed for information.

2. The proposal is for the Department to acquire the Kollegal Electrical Undertaking from the local Panchayat and carry out all future developments departmentally. The necessity for such acquisition is explained in the report.

3. In view of the high cost involved in the conversion of the Mysore bulk 25 cycles supply to 50 cycles, it is proposed to distribute power only at 25 cycles for the present. The question of changeover to 50 cycles will be examined late when the load develops.

4. The scheme has been worked out on a 5-year basis against the normal 10 years as the maximum load of about 300 K.W. which the Mysore Government can supply over their existing 13.2 KV. line will be used up within the next 5 years. It is estimated to cost Rs.3.40 lakhs and give a net return of 4.01% on the capital cost in the fifth year of operation. For reasons explained in the report, this return may be considered satisfactory, and the scheme sanctioned early.

CHIEF ENGINEER FOR ELECTRICITY.

Enc. 1 Report.
copies of 2 D.Os. for 43 intra

Copy of D.O.No.911 dated 13-3-1946 from the Chief Electrical Engineer, Government of Mysore, Bangalore to the Chief Engineer for Elecy., Madras.

I refer you to your letter dated the 18th Feb. 1946, intimating me that a surcharge of 10% is being levied by you in all the hydro-electric areas.

As you are aware, we are entering into an agreement for supply of bulk power to you both at Kollegal and at Ujjini at certain rates which are the high tension rates levied by you to consumers. I would request you to kindly let me know whether any provision is necessary in the agreements to make the surcharge also applicable to entitle this department to claim surcharge over the rates mentioned in the agreement whenever surcharge is levied by the Electricity Department of Government of Madras to its consumers.

Shall be thankful for a very early reply in the matter.

Copy of D.O. dated 15th March 1946 from the Chief Engineer for Elecy, Madras to the Chief Electrical Engineer to the Govt. of Mysore, Bangalore.

I have your D.O.No.911 dated 13-3-46. Para 1 & 2

The rate we agreed upon for supply at Ujjini is for power at 66 KV and normally it should be substantially lower than the rate for power at the H.T. distribution voltage of 11 or 22 KV. Our H.T. tariff is as I had informed you in my previous letter, for 11 or 22 KV supply and not for 66 KV supply.

A scheme for distribution of power in the Ceded Districts based on purchase of power from Jog has been submitted to Government and it is definitely not remunerative as per rules mainly because of the rather high bulk rate we have agreed to pay you. Nevertheless I have recommended its sanction in view of the Ceded Districts being poor and subject to famines.

In the circumstances I consider that the rate we agreed upon for Ujjini has to be considered definite and no provision for surcharge need be made.

For Kollegal where power at 13 KV is supplied I agree a provision for surcharge can be made and I suggest 10% for it, being the figure we have adopted in our Mysore hydro area. We have no intention to modify this surcharge rate for some years to come. In this connection I should be glad if you can kindly let know the maximum power you can let us have at Kollegal through your line from Sivasamudram to enable me to prepare a scheme for developing the area with that supply.

For Hindupur, your supply is to be at 33 KV and we have to run 33 KV lines therefrom to centres with 11 KV local H.T. distribution. In the circumstances, I suggest that the Ujjini 66 KV tariff be also applied to Hindupur, as the cases are analogous. A Scheme for supplying Hindupur area has also been submitted to Government based on Ujjini rates and even the scheme is not remunerative as per rules. Nevertheless I have recommended its sanction urging the same plea as for Ceded Districts the area being poor. I trust in the circumstance you would agree to Ujjini rate holding good for Hindupur.

I shall be glad if you would kindly cause the Ujjini power agreement to be ratified by your Government as early as possible, as work on the Ceded Districts Grid cannot commence until then.

With best wishes.

LOCAL ADMINISTRATION DEPARTMENT

From

S.B.Raja Singh Esq., B.A.,B.L.,
Executive Officer,
Panchayat Board,
Kollegal.

To

The Secretary to the Government
Local Administration Department
Madras.

R.O.C.No.3324/46 Dated 5-5-1946

Sir,

Sub: Electricity - Kollegal Panchayat Board - Electrical undertaking - taking over by Government - deputation.

I beg to submit that this Panchayat Board has decided in its resolution No.11 dated 16-4-46 (copy enclosed) to send a deputation of four of its members to meet the following honourable ministers secretaries to the Government and other officers:-

1. The Honourable ministers in charge of electricity and Local Administration
2. The Secretaries to the Government in the Local Administration Department and Public Works Department
3. The Chief Engineer for electrricity and
4. Chief Electrical Inspector to Government.

The object of the deputation is to discuss the question of handing over the Kollegal Panchayat Board Electrical undertaking to the Government or to discuss the question of obtaining bulk supply from the Mysore Government.

As the question of change over to Sivasamudram Hydro Electric supply from the present thermal supply is pending for a long time, it is considered desirable to discuss the whole scheme and other alternative proposals personally with the Honrable ministers, Secretaries and other officers so as to make the undertaking more serviceable to the public at an early date. I therefore request that the Secretary may be pleased to fix up a date during this month for the interview with the members of the deputation. An advance copy of the memorandum of the subject matter to be discussed at the interview is also submitted herewith.

S. B. Rajasingh

(True extract -translated from Canarese)

S.B.Rajasingh 5/5/46.
Executive Officer,
Panchayat Board, Kollegal.

MEMORANDUM OF THE SUBJECT MATTER TO BE DISCUSSED AT THE KOLLEGAL

1. The proposal for electrification of Kollegal was thought of as early as 1928 and it actually materialised in 1938 when the works were given on contract. The erection work was taken up in 1939. The erection of engines and distribution lines were completed by September 1940 and the plant and lines were brought into beneficial use on 1-10-1940.

2. The response from the public was quite good evidenced by getting full load in the form of power loads on the plant in a couple of months. The domestic side was not neglected. The load steadily rose to about 25 K.W. inclusive of street lighting. Owing to the outbreak of war, shortage of Diesel oil and control on further services the development was crippled and much progress was not done, but however the public had the satisfaction that they had not to grope in the dim light of the kerosene lights along the streets.

3. The advent of the Government Filatures brought in Hydro-Electricity with a mile and quarter from the Panchayat Board Power Station. Unfortunately this new power was supplied at a frequency of 25 cycles while the town supply was 50 cycles thus making a changeover from thermal to hydro electricity not an immediate possibility.

3. A request was made to Government in the year 1943 for changing over the existing thermal supply to hydro electric supply from Sivasamudram available at Filatures. In Memorandum No. 1332-III/S/43-27 P.W. dated 24-6-43 it was decided to convert the 25 cycles supply to 50 cycles and then continue the town supply at 50 cycles. Later, enquiries were made in February 1945 with leading firms for the supply of frequency changing equipments and it was found that the change over for a capacity of 60 K.W. would cost about Rs85 to 95 thousands nf. later, the whole question was again considered by the Chief Electrical Inspector to Government along with extension of supply to the whole taluk and proposals are understood to have been submitted for the acquiring of the Kollegal electrical undertaking by Government. The Board in its resolution No. 143 dated 8-12-45 has agreed to surrender the licence.

4. The war is now over; but our experience is that it is not still possible to secure spare parts of the German make engines installed in the power station. Indian made spares are compara-

comparatively low rate. The public are providing for service connections for various purposes mainly for domestic lighting. Considering the unsatisfactory position of existing supply difficulty is experienced to meet the demands of the public.

5. In the interest of the public general public and the undertaking in particular it is proposed

(i) that the terms set out in para 3 above for the supply of electric current may be adopted;

(ii) The question of charge over to be for electric power may be decided once for all early; after the completion of plant considered.

(iii) If the above terms do not favourably appear to the Government, steps may be taken to adopt the bulk supply given to Industrial Department only on the condition to the Licensee of the Hill stores etc. on the present tariff rate under power tariff B 1 of the booklet of printed conditions.

THE CHIEF ENGINEER FOR
ELECTRICITY,
Chepauk, Madras.

To
The Secretary to the Government of
Madras,
Fort St. George,
Madras.

No.A3/R.36/5547-G/42-22 dated 28th May 1946.

Sir,

Sub:- Kollegal Distribution scheme.

5 cmts Ref:- Government P.W.D. Memorandum No.1930-E/44-15 dated 9th May 1946.

I forward herewith for sanction of Government a revised report with estimates etc. for the Kollegal Distribution Scheme. The revision now made is based on the following:-

(1) Present day prices for the first year, and prewar costs plus 75% for the remaining years have been adopted.

(2) Interest charges have been calculated at 4%.

(3) An annual rate of 2.7% for depreciation computed on the sinking fund basis at 4% interest, has been adopted.

2 The revised estimate works out to Rs.1.705 lakhs initially, rising to Rs.3.5 lakhs in five years. The net return from the scheme in the 5th year of operation works out to 4.02% - vide Annexure 4. The scheme is, therefore, remunerative and may be sanctioned urgently.

3 Referring to para 2 of the above Government Memorandum, I would state that the purchase price of the Kollegal Electrical Undertaking is not capable of much adjustment. Also the bulk rate for power to be purchased from Mysore Government cannot ~~be~~ be changed as it has already been agreed to. No revision of the estimate in respect of the above is, therefore, feasible, nor does it appear necessary, as the scheme, as now revised, is remunerative.

4 Urgent sanction of the scheme is requested.

(1) CHIEF ENGINEER FOR ELECTRICITY.

KOLLEGAL.

3/7/46

This is a request from the residents and tax-payers of the Panchayat.

2- Electric power supply in the Panchayat has for long been short of public need. It is being supplied part time both for lightin and for industries- Many a social, a marriage or other function has been marred or unpleasantly disturbed by lights going off at 11 p.m to return the next day. Students, professional men with desk work cannot attend to their work in the cool hours before dawn and have to wait for daylight much to their inconvenience and that of the public dealing with them. Domestic work has likewise to be put off. For feeding children and the sick and the invalid other private arrangements have to be made. Educational programmes for school children have also to be missed for want of power. Many a house that is prepared to take power for lighting has to go without it for want of power as also small miscellaneous cottage industries that would engag many an idle hand. If there is anything that is occupying, and rightly so, the best minds in the world, it is reconstruction and planning. The present is besides a time when not mere gradual or graduated, but revolutionary changes affecting different aspects and departments of life in relation to the economic, social, educational and political side of it that old world methods of communication are of little benefit. The radio has become a necessity for cultural and civilized existence. Almost every home that can afford it should have a radio if it intends to keep pace with society. This needs electric power in service at all hours. A big weaving centre noted for its fabrics, Kollegal cannot now give its practioners a decent living because the work is being done by hand as of old unable to employ modern cottage machinery for want, inter alias, of cheap power. Silk looms are not keeping pace with other developments in Silk Industry for want of cheap power. The abnormal transient conditions arising out of the war should not blind us to facts. The

[illegible] mostly seen in Kollegal of the class most in need of relaxation and entertainment and who can afford it most - the merchant class - cannot benefit by the cinema as there is no second show and they have to choose between the only early show and business, much to the inconvenience of the public.

To be brief, expansion in the Electric Section of the Panchayat is an absolute necessity. Rural Kollegal has also moved Government to supply power for well irrigation to speed up production and reduce costs. The thermal plant in possession of the Panchayat is, from all accounts, in a moribund state incapable of serving the present and the growing needs of the Town and cannot compete with hydro-power. There is reason to believe that Government will be good enough to take the ~~correct~~ and unofficial information which there is no reason to discredit, is that it is willing to pay for the existing machinery. Your decision on our behalf at this moment is of momentous importance and is going to set Kollegal on the high road to progress and prosperity or to push it back to darkness and indigence. To hand it over, coincidentally with your earlier resolution, to Government will be in accordance with the wishes of your electors. Government with its ample funds and sufficiency of technicians would certainly be the most proper authority to assume responsibility in the matter. It is hoped that no party or private interests will deflect you from this course which is also in keeping with the latest trends in respect of public utility services that they should be State-managed. This may be brought to the notice of the members before the next meeting slated to come off on the 26th instant.

~~Recommendations~~.

The Govt sanction an estimate of Rs 1.705 lakhs (Rupees one lakh seventy thousand five hundred only) initially rising to Rs 3.5 lakhs (Rupees three lakhs fifty thousand only) in five years for the Kollengode electricity Distribution Scheme. The expenditure is debitable to A.C. to the works.

The CE(E) requested necessary action for provision of funds in the

Course. Meanwhile the A.G requested to admit the expenditure in audit.

4 The Cir (E) is also requested to report whether a separate agreement with the Mysore Govt is necessary for the bulk supply of power proposed under the Scheme, and whether the Hon'ble the Resident in Mysore should be addressed for the purchase of power from Mysore, and if so to submit the necessary proposals to the Govt.

I forward herewith a revised draft press note on the above Scheme. p.91 below

G Sundaram

Chief Engineer (Electricity).

Enc.

Subject: Kollegal Electricity Distribution Scheme.

The Government have sanctioned an estimate of Rs 1.705 lakhs initially rising to Rs 3.5 lakhs in 5 years for the Kollegal Electricity Distribution Scheme. Kollegal town is at present being supplied from a local oil engine power station. The supply is inadequate and costly. Under the scheme the power house and distribution will be purchased by the Government from the Panchayat, ~~and~~ the oil engine installation will be closed down, and hydro-electric power purchased from the Mysore Government from Sivasamudram will be distributed in Kollegal town and neighbourhood. This will help the development of the whole area.

****

KOLLEGAL

DISTRIBUTION SCHEME

REPORT.

****

REPORT

- on -

THE KOLLEGAL DISTRIBUTION SCHEME.

INTRODUCTION.-

The present supply of the Kollegal Panchayat undertaking is from an oil engine driven power house. The existing diesel engine sets, though installed only in 1940, are not in very good condition. Due to the high cost of generation and the necessity for fuel oil economy, the Panchayat is running its generating sets for only 10 hours a day, causing much inconvenience to the consumers. The financial position of the undertaking is also poor, the revenue falling greatly short of the expenditure. The Panchayat is not in a position to extend the electrical supplies.

2. In the interests of co-ordinated electrical development of urban and rural areas, it is desirable, in the circumstances, for the Department to take over the undertaking from the Panchayat and carry out all future development departmentally.

3. The Kollegal Panchayat is willing to sell the undertaking to the Department and the price of purchase can be fixed by negotiation.

4. Kollegal is situated far away from any of the departmental transmission lines and it will not be possible for the present to extend supply to this area from the Departmental Grid. It is, therefore, proposed to purchase bulk power from the Mysore Government (who have recently extended their 13.2 KV. lines to Kollegal in connection with the supply to the Silk Filatures) and distribute hydro-electric power to the town and neighbourhood.

5. The Mysore Government have been recently addressed in this behalf by the Madras Government.

S C O P E.-

6. The Scheme covered by this Report comprises :-

(a) taking Mysore hydro electric supply at 13.2 KV. at Kollegal at the same rates as agreed to, for supply to the Ceded Districts.

(b) building a distribution system to serve Kollegal and neighbourhood, and

(c) acquiring the Panchayat electrical undertaking and conversion of the equipment from 50 to 25 cycles.

DETAILS OF LINES AND EQUIPMENTS.-

7. The existing L.T. lines etc. will be retained as far as possible. In addition, the following lines and equipment are proposed to be erected initially:

(a) 4 miles of 13.2 KV. feeder lines

(b) 3 Nos. 13.2 KV./400-230-V. distribution transformer substations.

(c) Necessary L.T.lines, and

(d) Equipment for converting 50 cycles to 25 cycles.

8. The following additions are contemplated within five years:

(a) 6 miles of 13.2 KV. lines

(b) 8 Nos. 13.2 KV./400-230-V. distribution transformer substations, and

(c) Necessary L.T. lines.

LOAD FORECAST.-

9. The present demand of the Kollegal Panchayat Electrical Undertaking is of the order of 50 KW. With the changeover to Mysore hydro electric supply it is anticipated that the demand will rise to 100 KW. in the first year of operation and to 300 KW. within five years, when the town as well as a few neighbouring villages are proposed to be fed with electricity.

ESTIMATES.-

10. The estimates are based on the present day prices for the first year and pre-war cost plus 75% for the next two years and pre-war cost plus 50% thereafter. The summary and abstract of the estimates are given in annexures 2 and 3. The total cost of the scheme works out to Rs.1.705 lakhs initially and to Rs.3.400 lakhs in five years.

11. The price at which the Panchayat electrical undertaking is to be purchased by the Department is to be fixed by negotiation, as already stated. For purposes of estimating,however, the above cost has been arrived at from the book values of the materials and allowing depreciation in accordance with the Departmental Manual. To the resulting values, suitable appreciation factors have been applied in some cases to get at the present market values. The total cost so obtained works out to Rs.68,400/- of which about Rs.8,400/- represents cost of materials which will not be required and could be disposed of. The net debit towards the cost of the undertaking is, therefore, Rs.60,000.

PROGRAMME OF EXPENDITURE.-

12. The programme of expenditure to the end of the fifth year of operation is given in the Financial Forecast in annexure 4.

TARIFFS

13. As it is proposed to purchase bulk hydro electric power from Mysore at bulk H.T. rates, it is proposed to charge the Departmental consumers at hydro tariff rates, but with a surcharge of 25% instead of the 10% as per G.O.No.2938-P.W.(Elec.) dated 19th November 1945. This higher surcharge is necessary and justified in view of the fact that the main load on the distribution will be industrial and agricultural,carrying lower tariff rates. The rates proposed will, however, be lower than those at which existing licensees in the area will be able to generate and sell to similar loads

KOLLEGAL DISTRIBUTION SCHEME.

REPORT (Revised).

REPORT

on

THE KOLLEGAL DISTRIBUTION SCHEME.

INTRODUCTION.-

The present supply of the Kollegal Panchayat undertaking is from an oil engine driven power house. The existing diesel engine sets, though installed only in 1940, are not in very good condition. Due to the high cost of generation and the necessity for fuel oil economy, the Panchayat is running its generating sets for only 10 hours a day, causing much inconvenience to the consumers. The financial position of the undertaking is also poor, the revenue falling greatly short of the expenditure. The Panchayat is not in a position to extend the electrical supplies.

2. In the interests of co-ordinated electrical development of urban and rural areas, it is desirable, in the circumstances, for the Department to take over the undertaking from the Panchayat and carry out all future development departmentally.

3. The Kollegal Panchayat is willing to sell the undertaking to the Department and the price of purchase can be fixed by negotiation.

4. Kollegal is situated far away from any of the departmental transmission lines and it will not be possible for the present to extend supply to this area from the Departmental Grid. It is, therefore, proposed to purchase bulk power from the Mysore Government (who have recently extended their 13.2 KV. lines to Kollegal in connection with the supply to the Silk Filatures) and distribute hydro-electric power to the town and neighbourhood.

5. The Mysore Government have been recently addressed in this behalf by the Madras Government.

S C O P E.-

6. The Scheme covered by this Report comprises:-

(a) taking Mysore hydro-electric supply at 13.2 KV. at Kollegal at the same rates as agreed to, for supply to the Ceded Districts.

(b) building a distribution system to serve Kollegal and neighbourhood, and

(c) acquiring the Panchayat electrical undertaking and conversion of the equipment from 50 to 25 cycles.

DETAILS OF LINES AND EQUIPMENTS.-

7. The existing L.T. lines etc. will be retained as far as possible. In addition, the following lines and equipment are proposed to be erected initially:

(a) 4 miles of 13.2 KV. feeder lines;

(b) 3 Nos. 13.2 KV/400-230 V. distribution transformer substations;

p.t.o.

(c) Necessary L.T. lines; and

(d) Equipment for converting 50 cycles to 25 cycles.

8. The following additions are contemplated within five years:-

(a) 6 miles of 13.2 KV. lines;

(b) 8 Nos. 13.2 KV/400-230 V. distribution transformer substations; and

(c) Necessary L.T. lines.

LOAD FORECAST.-

9. The present demand of the Kollegal Panchayat Electrical Undertaking is of the order of 50 KW. With the changeover to Mysore hydro-electric supply it is anticipated that the demand will rise to 100 KW. in the first year of operation and to 300 KW. withih five years, when the town as well as a few neighbouring villages are proposed to be fed with electricity.

ESTIMATES.-

10. The estimates are based on the present day prices for the first year and pre-war cost plus 75% for the remaining years. The summary and abstract of the estimates are given in annexures 2 and 3. The total cost of the scheme works out to Rs.1.705 lakhs initially and to Rs.3.500 lakhs in five years.

11. The price at which the Panchayat electrical undertaking is to be purchased by the Department is to be fixed by negotiation, as already stated. For purposes of estimating, however, the above cost has been arrived at from the book values of the materials and allowing depreciation in accordance with the -- Departmental Manual. To the resulting values, suitable appreciation factors have been applied in some cases to get at the present market values. The total cost so obtained works out to Rs.68,400/- of which about Rs.8,400/- represents cost of materials which will not be required and could be disposed of. The net debit ~~will not be required and could be~~ towards the cost of the undertaking is, therefore, Rs.60,000.

PROGRAMME OF EXPENDITURE.-

12. The programme of expenditure to the end of the fifth year of operation is given in the Financial Forecast in -- annexure 4.

TARIFFS.-

13. As it is proposed to purchase bulk hydro-electric power from Mysore at bulk H.T. rates, it is proposed to charge the Departmental consumers at hydro tariff rates, but with a surcharge of 25% instead of the 10% as per G.O. No.2938-P.W. (Elec.) dated 19th November 1945. This higher surcharge is necessary and justified in view of the fact that the main load on the distribution will be industrial and agricultural carrying lower tariff rates. The rates proposed will, however, be lower than those at which existing licensees in the area will be able to generate and sell to similar loads.

contd.

REVENUE AND FINANCIAL FORECAST.-

14. The estimated loads and gross revenues for the 5-year period are given in annexure 1. As mentioned above, the revenue is calculated on the basis of hydro-electric tariffs plus 25%. In line with the actual load factors for similar loads in other places, an average load factor of 28% in the first year rising to 32% in the fifth has been assumed.

15. The gross revenue is estimated at Rs.0.24 lakhs in the first year, rising to Rs.0.693 lakhs in the fifth year.

16. Annexure 4 gives the Financial Forecast worked out on a 5-year basis instead of the usual 10 years. This is due to the fact that the maximum power that can be transmitted over the existing 13.2 KV. feeders from Sivasamudram is about 300 KW. and this demand is expected to be reached withih the fifth year of operation.

17. The financial forecast has been worked out with the following assumptions:-

(a) Interest:- Interest charges have been calculated at 4%.

(b) Operation and Maintenance charges have been worked out at 2½% of the capital expenditure: this is based on experience.

(c) Depreciation:- An average annual rate of 2.7% has been provided for depreciation charges. This has been worked out on the sinking fund basis at 4% interest and taking into consideration the lives of the various items of equipment involved.

(d) Cost of power:- Assuming that the Mysore Government will supply power at the same rates as for Hindupur and Ceded Districts but with a surcharge of 10%, the cost of power payable to the Mysore Government works out to Rs.0.116 lakhs in the first year of operation, rising to Rs.0.38 lakhs in the fifth year.

SUMMARY.-

18. A summary of the financial results for the fifth year of operation is given below:-

1. Capital outlay at the end of 5 years ..	Rs.3.500	lakhs.
2. Arrears of interest	0.054	"
3. Sum at charge	3.554	"
4. Net revenue in the fifth year ..	0.143	"
5. Net return on capital	4.02%	

The scheme is remunerative and may be sanctioned urgently.

CONSTRUCTION PROGRAMME.-

19. The initial scheme, it is estimated, can be completed in about 18 months from the date of sanction of the scheme by Government.

S T A F F.-

20. Additional staff will be necessary and will be applied for separately.

Superintendent.

Note furnished by the Collector.

UPPLY OF HYDRO-ELECTRIC POWER. In view of the fact that the Gover ient have sanctioned the loan of Rs.65,000 for effecting a change ove from the present system of electric supply by permitting power to be aken from the Hydro-Electric supply from Mysore State--which is a vailable at the Government Silk Filatures, Kollegal, there is no objection to grant priority to the Panchayat Board to purchase the equipment for changing the frequency.

At present as electricity is generated by Diesel oil engines the hours of supply and the units for each company or mill have been restricted by the District Magistrate with reference to Government Orders. The supply has been rationed throughout. If the Panchayat Board gets the benefit of the Hydro-Electric Supply from the Mysore State at the Government Silk Filatures, they may be permitted to sel the electric power to new applicants in the town, so that the Board may get more revenue to repay the Government loan. This is reasonab but the question of distribution of electric energy to new applicants for house connections has to be settled by the Chief Engineer for Electricity and Government in each case as per existing orders unless a general relaxation is issued for this licence.

The control orders about the hours of supply and units whic are now in force will be withdrawn as soon as the Panchayat Board g the Hydro-Electric Supply from Mysore as there would then be unlimit power from an outside source.

COMMUNICATIONS. (a) Railway. Kollegal lies on one extremity of the district and is a hilly tract. The nearest plain country in this district is Satyamangalam which is 67 miles from Kollegal. The road from Satyamangalam to Kollegal is a ghat road and practically the entire road runs through reserved forests. The nearest railway stati to Kollegal is Maddur which is only 40 miles from Kollegal. In 1927 the Railway investigated a project for connecting Erode and Nanjango (Mysore State) by rail via Satyamangalam. After the investigation the scheme railway communication has been extended to Chamrajnagar from Nanjangode. Chamrajnagar is nearer to Kollegal than Nanjangod When the above scheme is put into execution the question of connecti Chamrajnagar with Kollegal may be considered. This scheme will be preferable in that it will connect it with the rest of the district a shorter route than a line opened from Maddur to Kollegal.

(b) Roads. The Panchayat Board states that the portion the road (i.e.)(the direct route connecting Kollegal with Coimbat via Bylore, Hassanur, Dimbam and Satyamangalam) between Bylore an Kollegal is crossed by two big streams, Haskatti and Uduthurai fa

and another big stream by name Gundal, and requests that the 24
construction of bridges over these streams may be taken up as part
of ~~bridges over~~ Post War Reconstruction Programme. A scheme of road
development which might be taken up during Post War Reconstruction
was submitted to Board in this office D.Dis. 718-44 dated 21-3-44
wherein the construction of bridges over the streams crossing the
road between Kollegal and Hassanur has been included.

Sub:- Kollegal Panchayat Bd. - Memorandum to H.E. the Gover[illegible]

~~From the Governor's Secty., U.O.No.[illegible]-2 dated 3-5-44.~~

A.S.

Please see the Governor's Secty. U.O. note at pp.1-7 ante, containing extract from the Memo. presented to H.E. by the Kollegal Panchayat Bd. and a brief note furnished by the Collr. of Coimbatore. The requests of the Panchayat Bd. are:-

(1) to give the necessary priority to purchase the equipment required in connection with the changeover of the P.Bd. Elecl. undertaking from thermal power to Hydro power to be purchased from Mysore;

(2) to permit the Bd. to augment its revenue by sale of Mysore Hydro power to new applicants, by lifting the ban on new service connections; and

(3) improvements of communications, especially railway, and construction of 3 suitable culverts or bridges on Kollegal-Coimbatore road as a part of post-war reconstruction programme.

2. Item (1) above. In G.O.814-L.A., dated 11-4-44, the Govt. have ~~provided~~ issued orders providing in the budget for 1944-~~45~~ 45 a sum of Rs.65,000/- towards the grant of a loan to the Panchayat for the purchase and installation of the equipment. The Panchayat Bd. has also been asked to arrange in consultation with the C.E.(E) for the purchase of the machinery. The C.E.,(E) has stated previously that no suitable equipment is available in India and has to be imported, and that the approximate period of delivery in India is about 1 year from the date of sanction for ordering the sets subject to high priority being obtainable from the manufacturer. It seems that the necessary priority certificate has to be issued by the Govt. of India. ~~For orders~~ ~~with reference to G.O. 814-LA, 11.4.44 the Panchayat Bd. will be~~ ~~whether the C.E.(E.) may be asked to take~~ necessary action to obtain the priority certificate in consultation with the C.E.(E). ~~The C.E. may be asked to report the present stage. A~~ ~~memo is submitted.~~

3. Item ~~(2)~~ (2) There are the ~~two~~ following two restrictions on development of load in the Kollegal Elecl. Undertaking area where power is generated by a diesel oil station:—

(a) the rationing orders issued by the Govt. in [illegible]28-P.W., dated 6-6-42 and 2762-P.W., dated 5-8-42 and

Public Works Department.

From the Chief Engineer (Electricity) No.A.3/R.[illegible]/5547-G/42-125 dated 1--4--46.

In a memorandum submitted to H.E. in 1944, the Kollegal Panchayat Board made the following requests among others

(i) to give the necessary priority to purchase the equipment required in connection with the change over of the Panchayat Board Elecl. undertaking from thermal power to hydro-power to be purchased from Mysore; and

(ii) to permit the Board to augment its revenue by sale of Mysore hydro-power to new applicants by lifting the ban on new service connections.

2. The question of the change-over of the Kollegal Electrical undertaking to hydro-electric supply from Mysor State has been studied by the C.E.I.G. The tendered price of the equipment required by the undertaking varied from Rs.85,000 to Rs.95,000 as against the originally assumed price of Rs.65,000/- The C.E.~~(E)~~ I.G., therefore suggested ~~(to the G.E.I.G.)~~ an alternative proposal of Govt. taking over the undertaking and extending supply all over the taluk. The C.E(E) has accordingly ~~He has~~ now forwarded a report with estimates for the Kollegal Distribution scheme and has stated that the Panchayat Board is willing to sell the undertaking to the Department.

3. The Scheme: The proposal is to acquire the Kollegal Panchayat's undertaking purchase bulk power from the Mysore Government and distribute it to the Kollegal town and the neighbourhood. In view of the high cost of conversion of the Mysore bulk 25 cycles supply to 50 cycles, it is proposed to distribute power only at 25 cycles for the present and the C.E.(E) states that the question of change-over to 50 cycles will be examined later when the load develops. The proposal may, perhaps, be accepted.

4. The load forecast: The present demand of the undertaking is of the order of 50 K.W. With the change over to Mysore hydro-electric supply, the C.E(E) anticipates that the demand will rise to 100 K.W. in the first year of operation

P.T.O.

3 stations and to 300 A.... within 3 years.

5. Estimate: The total cost of the scheme is estimated at Rs.1.705 lakhs initially rising to Rs.3.400 lakhs in 3 year The estimate includes provision for Rs. 60,000/- towards the cost of the undertaking. The following points are brought to notice :-

(i) The estimates are based on the present day prices for the first year and pre-war cost plus 75% for the next two years and pre-war cost plus 50% thereafter.

(ii) The price at which the undertaking is to be purchased is to be fixed by negotiation. The estimate of Rs. 60,000/- referred to above has been worked out by the C.E.(T)&M and will be subject to alteration as a result of negotiation.

(iii) It is assumed that the Mysore Government will agree to supply bulk power at the same rates as they have agreed to in the case of supplies to the Ceded Districts and Hindupur. ~~The Mysore Govt. have already addressed in the matter and their reply is awaited, in the linked file (C.No.1352 E/43).~~ The estimate also assumed for a surcharge of 10 per cent payable to the Mysore Govt.

5 In the case of the Pykara Plant Extensions III stage scheme Finance Secy. remarked that for all schemes, the basis of pre-war prices plus 75% should be adopted also for outlay from 1950 onwards If this basis is followed it seems that the present estimates will have to be increased. It is also not known at present whether the Kollegal Panchayat Board will agree to sell the undertaking at a price of Rs.60,000/- The consent of the Mysore Govt. to supply bulk power at the same rates as ~~they have agreed~~ to in the case of supplies to the Ceded Districts and Hindupur has yet to be secured. It would therefore appear that the C.E.(E) may be asked to complete the negotiations for settling A and B above and to send revised estimates with reference to the final settlement to be made and with reference to C above.

6. Tariffs: For reasons given in para 13 of the report, the C.E.(E) proposes ito charge the departmental consumers at hydro tariff rates plus 25% surcharge. His proposal may, perhaps, be accepted.

para 17(c) p3 (G)

7. Depreciation : An average annual rate of depreciation of 3% has been assumed, taking into consideration the lives of various items of equipment involved instead of the rate of 2½% to be provided under the rules. The rate adopted may perhaps be accepted.

para 18, p3 (G)

8. Revenue and Remunerativeness. The capital outlay at the end of 5 years is estimated at Rs.3.400 lakhs and including the arrears of interest of Rs. 0.013 lakhs, the sum at charge is estimated at Rs.3.413 lakhs. The net revenue in the fifth year is estimated at Rs.0.137 lakhs which works out to a net return of 4.0 per cent on capital. ~~Although a return of 6% has been~~ prescribed as the standard of remunerativeness for such schemes, the C.E.(E) says that the estimated return of 4.01% may be considered satisfactory as the current ~~borrowing rate of Government is only 3.5%.~~ The Govt. have since fixed 4% as the criterion of productivity for schemes sanctioned with effect from 1--4--46. If the estimate is revised with reference to C on page 2D ante the net return may fall below 4%.

9. For orders whether the scheme of taking over of the Kollegal Panchayat Board Electrical Undertaking and supplying the P.Bd. area and its neighbourhood with power purchased from Mysore may be examined further after the getting information at D on p. 2D ante. L.A. and Finance may see for remarks.

Pay 6/4/46 11.4.46

Fri(Exp.C). Revenue. 10651-1A

16/4/46

The proposal is to acquire the Kollegal Panchayat Electrical undertaking and purchase bulk power from the Mysore Govt. and distribute it to the Kollegal town and the neighbourhood. The details of the scheme are given in the report at (G) ~~for carrying from any of the departmental treasury~~ Kollegal is situated 289 miles and reports from ~~can be obtained~~ Bangalore City ~~is not~~ at present. (G)

The scheme is estimated to cost initially Rs 1705 lakhs rising to 3·40 lakhs at the end of five years. The gross revenue is estimated at Rs ·24 lakhs in the first year rising to Rs ·693 lakhs in the fifth year. The return on the capital is estimated at 4,301 o/o.

The P. W.D. have examined the proposals in their note on pp. 20-21 above. They propose to ask the C.E.(E) to revise the estimates with reference to their remarks in para 5 of their note on p. 20 above and to examine the scheme further on receipt of the revised estimates.

It will be observed from para 17 of the report at (G) that the rate of interest adopted in working out the forecast is 3½ p.c. per annum. Fri. may suggest that, as the proper rate of interest to be used in working out these forecasts is 4 o/o p.a., the same as the present criterion of productivity (4 o/o p.a.), the estimate for the scheme be revised adopting a rate of interest of 4 o/o p.a. throughout.

Fri 29/4/46 Dw

For depreciation, provision has been made at 3 p.c. for the first year of operation based on the lives of the various items of equipment. This may perhaps be accepted.

Fri 29/4 Dw

No other remarks are called for at present pending receipt

of the revised estimate and further examination of the Scheme by the P. W. D. The question of financial procedure to be adopted may be considered after the revised estimate is received.

rev 17.4.46

As the proposal involves only the purchase of an existing electrical undertaking from the Kolleg Panchayat it does not appear that this can be classified as a P. W. development scheme - cf this dept. note at 'M' on p. 10 ante in linked file.

The C.E. (E.) may be told that he should try to negotiate tentative terms for purchase of the plant from the 'Panchayat' Board & purchase of bulk power from Mysore in such a way that the estimates, when revised on the lines now ordered, will show an ultimate return of at least 4% p.a. and so satisfy the criterion of productivity

29.4.46

(1 MAY 1948 2841

Notes from p. 19 ante may be perused. A draft memo to the C.E. (E.) with reference to 'A' and 'B' p. 22 ante and 'B' above is submitted.

Please see Finance Secy's note above

In his recent interviews with Secretary, the C.E. (E) protested against the adoption of an ultimate return of at least 4% p.a.

7.5.48

7.5.48

He has promised to give his reasons in his replies. No references made to it on this point (return of 4%) in the concerned files, viz. Ceded Dts. Scheme etc. pending receipt of his remarks on this point in the other files, the Finance Secy's suggestions in the

From the C.G.(E) No. ~~55[illegible]~~ G/42-126 dated 7.5.46 ~~From the Legal Adviser No. 3501-A dated 8.5.46~~ ~~No. 1385-A " 10.5.46.~~ P 57

Please see the letter from the Executive officer, Kollegal Panchayat Board to the Secretary to Govt, P.W.D. stating that the Panchayat Board has decided to send a deputation of four members to meet the H.Ms.(I & C), Secretary, Govt, L-A-D, CE(E) and CE I.A. and requesting for fixation of a date, on the 9th to 11th May 46 for an interview. The CE I.A. has already telegraphed that CE I.A. will be away at Simla and that the date of deputation may be postponed. The C.G.(E) has remarked that the scheme is under the consideration of Govt and that when the scheme is sanctioned by Govt, action regarding the taking over of the undertaking will be taken. Has considered also that a deputation is unnecessary. In Memo No. 1930 E/44-15 dated 9.5.46 the C.G.(E) has been asked to revise the estimate for the Kollegal Division. In the memo. it is stated that the E.O., Kollegal Panchayat Board may be informed as suggested by the C.G.(E) at A above. Draft reply to the Executive Officer, Kollegal as at A above is submitted. Govt L-A-D may see before issue.

The Panchayat Board has postponed the deputation as CE I.A. is away - vide the telegram at P 57 CF.

DDS 18.5.46

p. 1 — Issued as memo No. 1930 E/44-17 dt 19.5.46

p 63 CF — From the C.E(E) No. 43/R.36/5547-G/42-22 dt 28.5.46

The file relates to the Kollegal Elecy Distribution Scheme. Under this scheme it is proposed to acquire the Kollegal Panchayat electrical undertaking and purchase power in bulk from the Mysore Govt for distribution in the Kollegal town and the neighbourhood. The C.E(E) at first submitted a report for the scheme (at flag 'G') adopting -

para 2-4, p 1 of (K)

para 1, p 41 CF

para 10, p 2 of (G)

i) Present day prices for the first year, pre-war cost plus 75% for the next two years and pre-war cost plus 50% thereafter

para 17(a) on p 3 of (G)

ii) Interest rate at 3½% p.a.

In the memo on pp 45-46 CF, he was asked to revise the estimate and forecast assuming -

pp 45-46 CF

i) Pre-war prices plus 75% from 1950 onwards

ii) Interest at 4% p.a.

A

He was also asked to negotiate tentative terms for the purchase of the Kollegal electrical undertaking from the Panchayat Board and for the purchase of bulk power from Mysore Govt in such a manner that the estimate when revised will show an ultimate return of at least 4% p.a so as to satisfy the criterion of productivity.

para 1, p 63 CF

2. The C.E(E) has accordingly submitted a revised estimate, which is at (K).

The estimate as revised works out to Rs 1.705 lakhs initially rising to Rs 3.500 lakhs in five years (as against Rs 1.705 lakhs rising to Rs 3.400 lakhs in the original estimate). The net return on capital is estimated at 4.02 % (as against 4.01 % in the original estimate). As the present criterion of productivity is only 4 %, the scheme is remunerative. With reg. to 'R' on p.23 ante it is not that the C.E(E) has justified that a return of 3.5 % for the Cabinet dep. scheme should be taken as adequate and that a fresh report relating to the whole Bhadravathi scheme is awaited.

3. In the original report, the C.E(E) made provision for depreciation at an average annual rate of 3 % taking into consideration the lives of the various items of equipment involved. But, in the revised report he has adopted a rate of 2.7 %, which, he says, has been worked out on the sinking fund basis at 4 % interest and taking into consideration the lives of the various items of the equipment involved. The revised rate adopted by the C.E(E) may be accepted.

4. With reference to 4 on p.25 ante, the C.E(E) states that the purchase price of the Kollegal undertaking is not capable of much adjustment and that the bulk rate for Mysore power cannot also be changed as it has already been agreed to. He therefore considers that a revision of the estimate in this regard is not feasible nor also necessary as the scheme as now revised is remunerative. He requests urgent sanction of the scheme.

5. In the circumstances stated by

EL A

The C.E.(E), his proposal may be supported in this dept. The file may be sent to L A/C Finance for remarks.

[Previous note of this Deptt. at pp. 21-22 ante.]

Local Administration Dept. 18563 16 JUN 1946 Secretariat, Malta

Please see the revised report with estimates for the Kollegal Distribution scheme submitted by the C.E.(E) on p 63 of L and at (A) flew and the notes of f.w.D. on pp 25-26 ante. The proposal of the C.E. may be agreed to in this Dept and the file passed on to Fin. no (presumably the question of settling the price of the undertaking will come up later). It is stated in para 3 of the report at (A) that the Kollegal Municipality is willing to sell the undertaking to Govt. and that the price of purchase can be fixed by negotiation. The file may be passed on to Finance no.

(Previous Finance note on pp 22-23 above)

Please see the revised report on the Kollegal Distribution Scheme with estimates submitted by the C.E.(E) with

this letter on p. 63 c.f. and the further note of the P.W.D. on pp 25-27 above.

2 According to the revised estimate, the scheme is estimated to cost Rs 1.705 lakhs initially rising to Rs 3.5 lakhs in the fifth year as against the estimate of Rs 3.45 lakhs arrived at in the original estimate. The gross revenue is Rs 0.24 lakhs in the first year rising to Rs. 0.693 lakhs in the fifth year. The net return on the capital is estimated at 4.02%. As this is over 4%, the present criterion for productivity, the scheme is a remunerative one. The proposal to acquire the Kollegal Panchayat Electrical Undertaking and to purchase bulk power from the Mysore Govt. for distribution in the Kollegal town and the neighbourhood may, therefore, be accepted.

Fin 21/7/46
1/7
27.7.46

3 As the total cost involved in the scheme exceeds Rs 2 lakhs, the proposal should be treated as a 'new service' and the 'new service' procedure followed. Steps should also be taken to provide the necessary additional funds by obtaining a supplementary estimate in the course of the year.

Fin 2.7.46

27.7.46

The file relates to the Kollegal [illegible] Scheme. Under this scheme, it is proposed to acquire for the reasons given in para 1 at page 1 of report at (K) the Kollegal Panchayat Electrical undertaking which supplies electricity from an oil station, and to purchase hydro-electric power in bulk from the Mysore Govt. for distribution in ~~the~~ Kollegal town and the neighbourhood. Kollegal is situated far away from any of the Madras Govt. Electricity Departmental lines and it will not be ~~possible~~

Para 4 p1 (K) para 1, p4 of CF

be possible for the present to extend supply to this area from the Govt. Electricity Departmental Grid. The C.E(E) at first submitted a report for the scheme, which is at flag 'G', adopting

para 10, p2 of C

(i) Present day prices for the first year, pre-war cost plus 75% for the next two years and pre-war cost plus 50% thereafter; and

(ii) Interest rate at 3½% per a

p.4 of CF

He was asked to revise the estimate and forecast assuming

(i) Pre-war prices plus 75% from 1950 onwards and

(ii) Interest at 4% per annum.

The C.E(E) has accordingly submitted a revised estimate. It is at flag 'K'.

p1 of (K)

2. The C.E(E) has reported that the Kollegal Panchayat is willing to sell the undertaking to the Electricity Dept and that the price of purchase can be fixed by negotiation. The

p2 of (K)

present demand at Kollegal is of the order of 50 K.W. With the change over to Mysore Hydro-Electric supply, the C.E(E) anticipate that the demand will rise up to 100 K.W. in the first year of operation and to 300 K.W. in five years. when the town as well as a few neighbouring villages are proposed to be fed with electricit

para 13, p2 of (K)

The C.E(E) proposes to charge the consumers at hydro tariff rates with a surcharge of 25% instead of 10% allowed in the hydro-~~electric~~ electric areas. This higher surcharge, he states, is necessary and justified in view of the fact that the main load on the distribution will be industrial and agricultural carrying lower tariff rates. He however points out that the rates proposed will still be lower than the rates at which ~~the~~ existing licensees in the area will be able to generate and sell to similar loads.

para 10, p2 of (K)

3. The estimate for the scheme as revised works out to Rs.1.705 lakhs initially rising to Rs.3.500 lakhs in five years.

p3 of (K)

The net return on capital is estimated at 4.02 %. As the present criterion of productivity is only 4%, the scheme is remunerati

A.S.

Please see para 4 of G.O. No. 2434 P.W. dt 13.9.46 at p. 82 C.f and para 1 of C.E.'s letter at p. 85 C.f. In view of the reason stated by the C.E.(E), no further action seems called for.

Regarding 2nd para of the C.E.'s reply, action being taken separately to address the Mysore Govt on the subject.

As regards para 3 of the C.E.'s letter, it is ~~submitted~~ not clear whether the C.E. has scrutinised the draft press note with refee to Memo No 1479 E/46-5 dt 23.9.46, in which the C.E. was asked to see that such press notes contained some background information in order to enable the layman to understand the scheme and its importance. Perhaps the C.E. may now be asked whether he had this point in view while scrutinising the draft and whether the draft needs any amplification and, if so, to submit a revised draft press note. Subject to approval, a draft Memo. to C.E. is submd.
